

Typical Properties Specification

PROTECTO-LUBE

<i>Typ Vis@100 cSt ASTM D445</i>	<i>5.2</i>
<i>Typ Vis@40 ASTM D445</i>	<i>32</i>
<i>Typ VI ASTM DS39B</i>	<i>88</i>
<i>Typical API Gravity @ 60 ASTM D287</i>	<i>31.0</i>
<i>Density - pounds/gallon ASTM D1250</i>	<i>7.25</i>
<i>Typical Pour Point F ASTM D97</i>	<i>-20F</i>
<i>Flash open or closed</i>	<i>OPEN</i>
<i>Typical Flash Point F ASTM D92</i>	<i>385F</i>
<i>Color(Visual)</i>	<i>L2.0</i>
<i>Typical Moisture</i>	<i>PASS POP TEST</i>

Chicagos Pneumatic's anti-wear hydraulic oils are formulated with high quality, virgin refined base oils and hydrolytically-stable additives that provide excellent lubricating performance in hydraulic systems. They are compatible with all relevant metals and are recommended for use in all types of hydraulic applications. These fluids also contain anti-foaming additives which not only control foaming, but also reduce air entrainment which can affect hydraulic pressure and may contribute to increased wear and oxidation.
